GRIFFIN
PUMP & EQUIPMENT, INC.

Griffin Pumps Have Been On The Job Since 1934.

Griffin is one of the oldest and most respected names in the groundwater control industry.

The handling of groundwater is among the most complex of all construction problems.

Griffin Pump has over 70 years experience in manufacturing innovative equipment that is a direct result of field experience.

Griffin has always focused on building rugged pumping equipment that would keep pace as we improved many of the now classic dewatering techniques such as wellpoint, jetting and eductor systems.

That same drive for innovation exists today in meeting the high flow requirements for large bypass and maintaining low noise level in residential areas with the silent package pumps.

Whether you have a need to purchase, to rent or for service; our sales, technical and field personnel

are dedicated to one principle phi-

losophy – to serve our customers by providing the

most effective techniques

and equipment to control

groundwater on time and

on budget. Griffin prides

itself on responsiveness,

service and dependability.

Our sales and support team is unsurpassed in the depth of knowledge and experience they bring to all projects.

Around the clock, seven days a week, from locations across North America, our specialists are available to assist in solving a variety of operational problems.

The Strength of Today's Griffin.

From a Proud Past.

Variable-Use Vacuum-Assisted Non-Clog Pumps

Suited to meet all of your bypass, sumping and dewatering needs in sizes ranging from 4" to 16". Handles air volumes from 50 to 150 cfm and solids up to 3". Flows 500-12000 gpm. Designed with two or three port non-clog impellers.

Variable-Use Trash Pumps

Suited for bypass or wellpoint applications with a standard double diaphragm priming system. Handles air volume of 70 cfm. Flows 750-5500 gpm.

Hydraulic Driven Submersible Pumps and Power Units

Available from 4" to 24" in a variety of configurations for material handling, trash handling and axial flow applications. Flows 300-20000 gpm.

Vacuum-Assisted Wellpoint Pumps

Designed for high air-handling capacity of 50-219 cfm and maximum performance at a variety of flows and head conditions in sizes from 4" to 10". Flows 500-3500 gpm. Vacuums to 30" Hg.

Silent Pac Pumps

Available in a wide variety of models for multiple types of applications such as bypass, wellpoints and sumping. Units are designed to provide a quiet operation where pumping is required and noise must be kept to a minimum.

High Pressure Jet Pumps

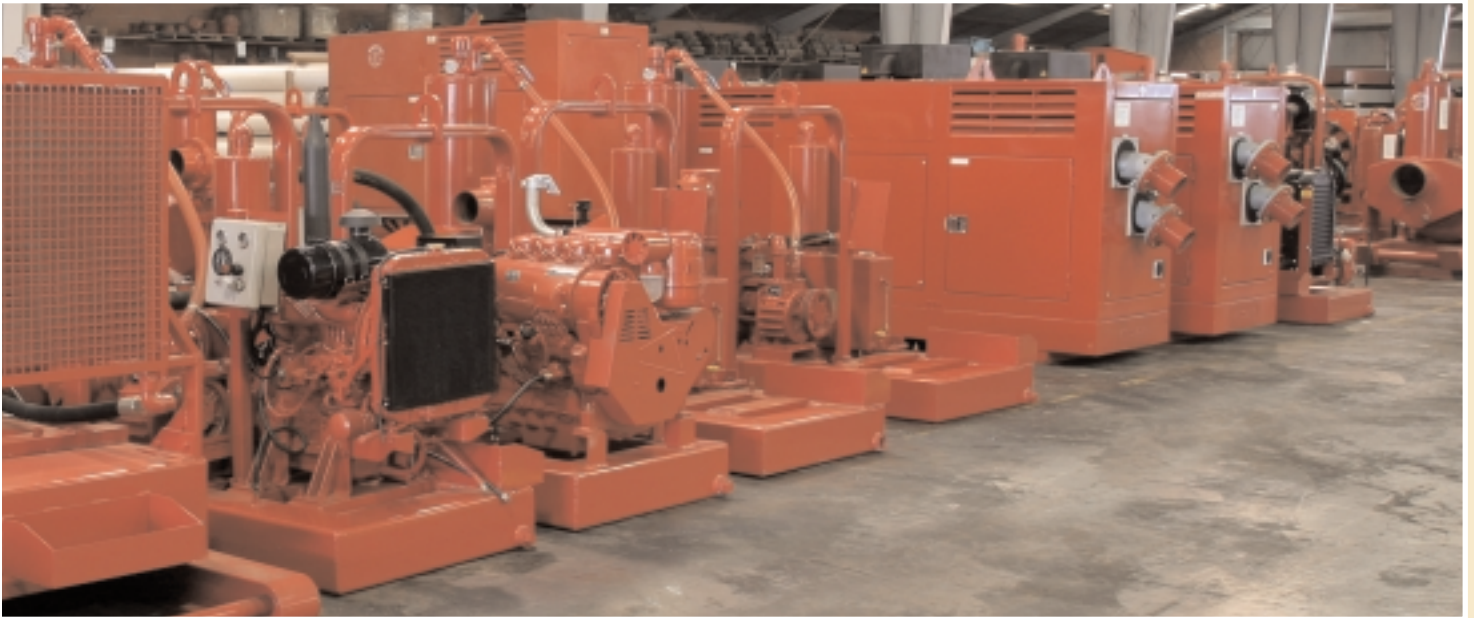

Standard 4" and 6" jet pumps provide you with the source to jet your wellpoint system or other high pressure applications. Pressure 80-350 psi.

Griffin Butterfly Swingjoints / Grommets / Header Systems

Butterfly swingjoints are designed with valves allowing for a fully adjustable flow through the wellpoint and to provide a flexible connection between the Griffin wellpoint and header system. Header Grommets allow in-field installation and operation or Griffin can provide a complete ready-to-install header system.

Wellpoints

Designed for excellent flow capability as well as screening capacity. Available in a variety of sizes in either PVC or stainless steel. Also available in self-jetting or non-jetting styles.

Unsurpassed Products And Services.

Griffin Pumps provide the highest air-handling capacity on standard units in the market and are uniquely designed to address the needs encountered in dewatering, bypass, open pumping and hydraulic submersible pump applications. Griffin units are designed to give long, trouble-free service and perform continuously for extended periods with minimal attention and maintenance.

Griffin offers an extensive line of products available for purchase or rental.

- Vacuum-Assisted Wellpoint Pumps
- Variable-Use Vacuum-Assisted Non-Clog Pumps
- High Pressure Jet Pumps
- Variable-Use Trash Pumps
- Silent Pac Pumps
- Hydraulic Driven Submersible Pumps and Hydraulic Power Units
- Eductor Pumps and Tanks
- Electric Submersible Pumps
- Complete line of Wellpoint Accessories such as Headers, Wellpoints, Swingjoints, Hoses and Screens
- Custom Manufacturing and Fabrication
