Griffin's Self Priming Trash Pumps are available in 4" and 6" models standard that do not require additional priming systems. These pumps are wet-priming portable pumps. They operate efficiently under intermittent flow conditions.

These pumps are capable of handling high flows and head conditions exceeding 125 ft. The pump includes a suction flapper to prime and reprime at suction lifts of 25 ft. and greater. The impellers can handle solids up to 3" and larger.

These pumps are available in diesel or electric models with an integral fuel tank or trailer mounted. Other options are available with these units. Contact Griffin for more information.
